.

.

Plan 23 - 29 Days - $140 + (6.9 * 22)\%$

Plan 24 - 30 Days - 300%

Explanations:

1. Starting percentages (what you see on the slide) increase every day by 6.9%.
For example: on 7 days plan of the project, the starting percentage will already be equal to 20% per day, $140 + (6.9 * 0) = 140\%$ for 7 days
2. The percentage is fixed at the start of the plan.
For example: For the 8 days of your plan, the percentage will be the same as it was at the very beginning of its work $140 + (6.9 * 1) = 146.9\%$ (In 8 Days)
